**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prior Art disclosed in the specification in view of Parker and Starrett and further in view of Japanese patent No. 404095287 to Takahashi (cited by applicant).

Reference is made to the reasoning set forth in the office action mailed on 12-24-2003.

***Response to Arguments***

Applicant's arguments filed 4-16-2004 have been fully considered but they are not persuasive.

With respect to claims 1 and 6, as discussed in last office action, the technique used in Takahashi to cover the recording area of the disk, may be used to cover the power calibration area of the disk of the Prior Art.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in

the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

With respect to claim 5, as discussed in last office action, covering, painting, coloring, etc., of the PCA area are some of different methods of making the disk non-recordable in that area. Therefore, combination of above prior art would make it obvious for one of ordinary skill in art to use any method of , scratching or abrading, in order to damage the PCA to provide permanently non-recordable, or provide write protection on the disk.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
